Hello Board,

I am a parent of two children 8 & 10 who were only 6 & 8 when this pandemic began. Two years in a little life is a vast amount of time. I am beginning to see the long-term effects of this on my kids and have heard much of the same from friends. My happy go lucky daughter had to spend three months away from school due to unprecedented anxiety that kept her from leaving the house at times. Masks are providing a warped security and detachment that makes it hard for them to take it off and show their faces; their unmasked faces feeling too exposed. We need to consider the long-term mental health implications of these mandates as well as safety. When it comes to vaccines, there is and never has been a one size fits all medical procedure and there simply hasn't been enough time to truly study this. Our children should not be the test subjects and parents should ultimately have the right to decide what is best for their own children. Give the power back to the parents and let us advocate for our children. I appreciate your time and consideration. This is a passionate plea.
