Subject: Test Kits

Dear Ms Bowers,

The school district gave out test kits to all students that wanted one before the break.

It has come to my attention that these test kits contain "Ethylene Oxide" which is a carcinogen. Information can be found here:

[https://www.cancer.gov/about-cancer/causes_prevention/risk/substances/ethylene oxide](https://www.cancer.gov/about-cancer/causes_prevention/risk/substances/ethylene_oxide).

I trust you will inform the parents about this serious and urgent matter.

I'm also curious to know what are the test kits looking for as " covid" have never been proven to exist.

CDC document CDC 2019-Novel Coronavirus (2019-nCov)Real-Time RT-PCR Diagnostic Panel and
