

2/24/22

Dear Craig Bueno:

I would like to express my concern about what is currently taking place in our school district. I believe that all parents and students should have a choice when it comes to being masked in school. Students are suffering mentally, emotionally and psychologically due to these mandates imposed by this district. Health decisions for our students should be family decisions, not that of a district board. These mandates are not law and therefore can be challenged and done away with. I ask that you consider this and act immediately to give families this choice.

Thank you for reviewing these mandates and thinking about a reversal to these directives.

Sincerely,

A handwritten signature in cursive script that reads "Ray Baird".
