Masks and Covid Vaccines should be a CHOICE

Comments \*

Hello Livermore School Board. Thanks for taking the time to read this.

We've hit the two year mark of Covid infiltrating our lives and it's time we make choices so that we can move on and our kids can live a normal life again.

Why are we still requiring masks in schools? Large groups can gather inside without masks, as seen last weekend in LA for the game, so why are our kids still required to wear them in school? Yes, there are some at risk kids - I get that. Their parents should make the choice to have them still wear a mask. But what about the other kids who are healthy and who also just had Covid?

Both of my kids just had Covid and it was super mild for them. They now have natural immunity which most will agree is better than any vaccine. They should be able to smile and laugh and see their friends and teacher expressions in the classroom. It's been proven these masks don't work - Omicron has spread like wildfire to those wearing masks and to those that are vaccinated and boosted. It's time to end these mask mandates and it's time to move on.

The new vaccine bill being proposed by our CA leadership is disgusting. The risks of the vaccine outweigh any benefit. Again, high risk kids, sure, get them vaccinated if you'd like but it should be the parents choice to do so.

Parents should make the decisions for their kids - not the government and not the school board. Let parents decide if they want their kids in masks. Let parents decide if they want to vaccinate their kids with this vaccine that is approved for emergency use only.

If your kid is sick, keep them home. If they no longer have symptoms, send them back to school. Let's end the class quarantine, repeated home testing and let's move on already. Enough is enough.
