Ms Prusso,

I appreciate your timely response.

It is extremely frustrating having to deal with a BOS who won't open up to the public, then to have our comments lumped together made it even more so. As I am not familiar with the "rules" it would have been nice to know, before hand, that you where going to do that. I feel disrespected by some members on the BOS like I'm stupid don't know what I'm talking about!

I'm saddened to a part of a community that continues to restrain our children with a suffocating device. The irreversible harm you are doing to these children is not for me to judge only God can do that.

I listened to a Mother at the BOS in TracyUSD Monday. Her 3 year old threw up in his mask because he had a headache, (he had been getting headaches from wearing the mask) and he didn't take the mask off because he was so afraid to. This is child abuse beyond comprehension.

The email I sent with the 'Mask' booklet attached lists the damage masks do to children and you all ignore these facts. After all they are all EUA never a LAW.

Don't get me started on the push to "vaccinate" our children. First of all they are not "vaccines" and do not prevent or stop the spread of anything. CDC, Fauci have admitted to this. A nurse spoke of a 10 yo coming into the hospital suffering from a heart attack after the jab. CHD reported a 6 yo having a heart attack after the jab. We need to come together and stop these jabs not encourage them. We are NOT been told the truth.

However thank you for clarifying and responding to my queries the other was regarding BOS meeting opening to the public.

Regards,
S.Winters
