School aged children- vaccine mandate and masks

---

**Comments \***

“COVID vaccines should not be mandated in K-12 schools. These vaccines are authorized for emergency use only, and are experimental. The long-term side effects are not known. The decision of vaccinating children should be left up to the parents. Young children are in such a low risk category it’s more risky to take the vaccine for them than to get Covid.

Furthermore children should not be required to wear masks at school- its interfering with communication, relationships with teachers and classmates. Speaking skills are declining, and many students’ confidence level.
