Dear Board Members,

I am writing to express my concern that the school board has not developed a remote learning option for the 2021-2022 school year, especially with a massive rise in daily cases across California and Alameda County.

I also find it concerning that the Covid-related facts that are provided on the LVJUSD websites are from June and do not represent the current state.

I invite the board to begin a conversation with the parents about the demand for remote learning options. I am willing to volunteer to help get a solution activated.

I eagerly await your response.
